

## Handleiding productfeeds bol.com

### Partnerprogramma

**Alle informatie in dit document is vertrouwelijk en mag niet worden verspreid of aangeboden aan derden zonder expliciete toestemming van bol.com BV.**

## Wat is een productfeed?

Een productfeed is een tekstbestand (.txt) met informatie over de beschikbare producten van bol.com. Deze informatie kunnen Partners gebruiken bij de promotie van bol.com producten op hun eigen website. Door gebruik te maken van een feed kunnen Partners gemakkelijk en snel veel gegevens verwerken en deze up-to-date houden. **De partner moet zelf de tracking toevoegen aan de informatie uit de productfeed.**

De productfeeds van bol.com bevatten de naam, categorie, subcategorie, prijs, levertijd, specificaties, afbeelding en URL van de beschikbare producten. Informatie kan door de geaccepteerde Partners geraadpleegd worden. Deze Partners staan op een whitelist.

Het bestand van de productfeed bestaat uit regels met informatie. Iedere regel vertegenwoordigt een ander product. De producten binnen een bepaalde categorie hebben dezelfde opmaak en specificaties.

De feeds worden iedere 2 uur ge-update. Sommige feeds worden minder frequent ge-update, zoals de boeken feed, muziek feed en de DVD feed. Deze drie feeds worden iedere dag bijgewerkt.

## Wat zijn de voordelen van een productfeed?

- De beschikbare informatie is up-to-date.
- Niet leverbare producten worden verwijderd uit de feeds.
- Veel informatie kan gemakkelijk verwerkt worden door de Partners.

## Hoe gebruik ik een productfeed?

Om gebruik te kunnen maken van een productfeed moet deze worden ingeladen in de website. Dit kan, afhankelijk van het eigen kennisniveau, op verschillende manieren:

- Doormiddel van een import in eigen database. Scripting kennis is hiervoor vereist.
- Doormiddel van plugins en standaard-scripts voor CMS pakketten, zoals Wordpress.
- Doormiddel van tools voor het ophalen van productfeeds.

## Inloggegevens

Om de informatie te raadplegen moet er worden ingelogd op de FTP-server van bol.com. Voor het ophalen van de productfeeds kun je ook gebruik maken van programma's zoals Filezilla of WSFTP.

## Soorten en bestandsnamen productfeeds

Wij bieden zowel een 'Best Buy' als bol.com-only feed aan. De Best Buy feed bevat voor ieder product het beste aanbod op het moment dat de feed wordt samengesteld. Dat kan het aanbod van bol.com of een zakelijk verkoper (bol.com Plaza) zijn.

In de laatste kolom van iedere productregel zie je aan de hand van een B (bol.com) of P (Plaza) wie het product aanbiedt. De bol.com-only feed bevat alleen het aanbod van bol.com. In deze feeds wordt het aanbod van externe verkopers niet meegenomen. Naast de feeds per productgroep is er een aparte feed met tweedehands boeken.

**Tracking URL**

De URL's in de productfeeds zijn reguliere productlinks naar de website van bol.com. Deze kunnen worden omgezet naar een tracking URL. Een tracking URL is nodig om te registreren van wie de verkoop afkomstig is. Zonder tracking URL wordt een verkoop niet correct toegewezen aan de verantwoordelijke Partner. De registratie wordt gedaan doormiddel van een cookie. Hieronder een voorbeeld van het samenstellen van een dergelijke link:

Product:

The Common Linnets Cd

Gegevens voorbeeld Partner:

SiteId is "144"

Subid is "123"

Naam is "linnets"

Productlink:

**<http://www.bol.com/nl/p/the-common-linnets/920000026169207>**

Opbouw tracking URL:

**[http://partnerprogramma.bol.com/click/click?p=1&t=url&s=SiteId&url=Productli  
nk&f=TXL&subid=SubID&name=Naam](http://partnerprogramma.bol.com/click/click?p=1&t=url&s=SiteId&url=Productlink&f=TXL&subid=SubID&name=Naam)**

Voorbeeld eindresultaat:

**Let op:** de correcte wijze van invoer is verantwoordelijkheid van de partner. Denk ook aan het encoderen van de productlink. Controleer dus altijd of je links werken in je rapportages voordat je deze definitief plaatst in je website.
